

*Elegant Design  
Comfort while Traveling*

## ELEGANT DESIGN – COMPACT DESIGN

With a weight of 17 kg, an installation depth of only 35 cm and a width of 58 cm, the tinyWASH finds a place in most rear garages or wardrobe.

*Elegant*  
*Compact*

The tinyWASH washing machine with integrated dryer has been optimized for mobile use and self-sufficient washing. The possibility of feeding the machine with water at temperatures of up to 60°C from the on-board system of the motorhome or boat reduces the electrical power consumption to a minimum.

## OPTIMIZED FOR CAMPING AND BOATING

*Autarchy  
Mobile*

### MINIMUM POWER CONSUMPTION

The use of hot water reduces the energy requirement for a full wash cycle at 40°C below 0.33 kWh.

### LOW WATER CONSUMPTION

The water consumption of a quick-wash program is about 12 liters, that of a full wash program is 18 to 24 liters.

The power consumption in the quick wash cycle (15 min) is only 0.37 kWh per wash.  
In the eco 40-60 washing program, the power consumption is 0.33 kWh.

The water requirement is only 12 litres per quick wash cycle and 18 to 24 litres for intensive washing.

LOWER  
ENERGY REQUIREMENT  
LESS  
WATER CONSUMPTION

*Efficient*

#### SAVING ELECTRICAL ENERGY

If hot water from the on-board system is used, the electrical energy for heating the water can also be saved.

#### OPTIMIZED WATER CONSUMPTION

Thanks to the load sensor, the washer-dryer controls the amount of water and also reduces water consumption when the load is lower.

Despite its compact design, the tinyWASH has a drum volume of 17 litres.  
In washing mode, it is possible to load up to 3.3 kg of laundry.

## SMALL, ROBUST AND POWERFUL

*Washing*

### WASHING DRUM

High-quality washing drum made of stainless steel with integrated LED lighting.

### MOTOR

Speed-controlled direct drive motor, robust and reinforced. No backup is required for the ride.

Washing and drying in one device. Our washer-dryer has an integrated dryer with a load capacity of up to 1.5 kg.

## WITH INTEGRATED DRYER

*Drying*

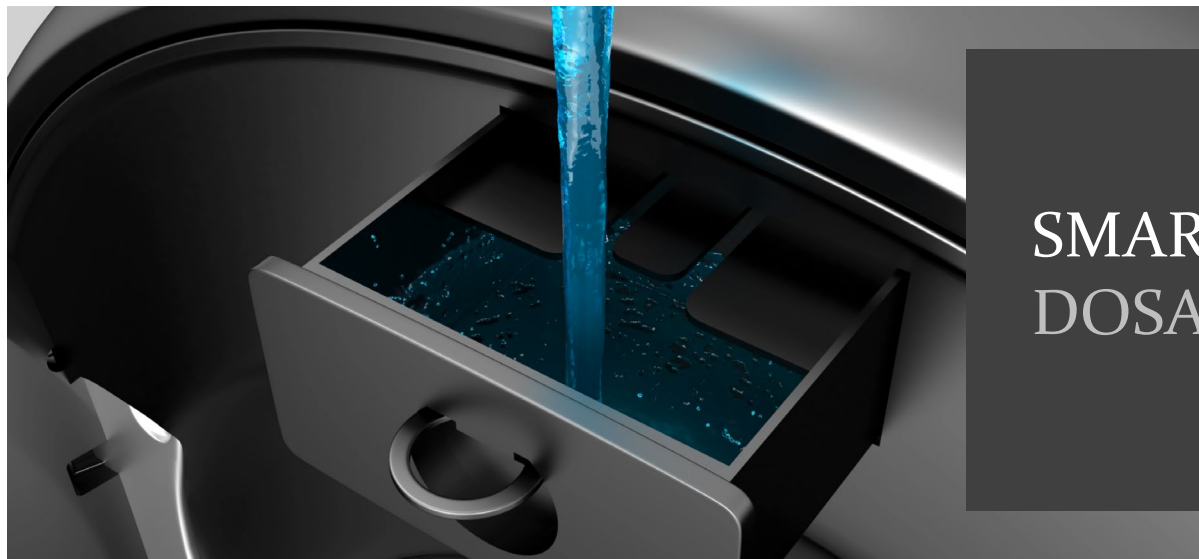

### DRYING TIME

The duration of the drying process can be in steps of 30, 60, 90, 120 and 180 minutes.

### DRYING MODE

The drying program can be selected in combination with the washing program as well as a single program

The tinyWASH controls the amount of water via the integrated load sensor and has an automatic detergent dosage for liquid detergents. Depending on the load, the machine adjusts the amount of detergent used, water and the washing time of the program.

## SMART DOSAGE

*Intelligent*

### INTEGRATED DETERGENT TANK

Integrated detergent storage tank for up to 400 ml liquid detergent.

### INDIVIDUAL USE

The detergent can be added either via the automatic dosing from the tank or manually into the washing drum.

With the touch control display, the washing program can be easily selected and all desired settings can be made quickly and easily.

As individual as your laundry. For each washing program, select the temperature, extra water, number of rinses, drying time and amount of detergent.

EASY TO USE  
INDIVIDUAL SETTING

*Functional*

#### WASHING PROGRAMS

Six washing programs are available. From a simple quick wash of 15 minutes to an intensive cleaning at 90°C.

#### OTHER FEATURES

Hand-washed garments can also only be rinsed and spun. A self-cleaning program makes it easier to maintain the machine.

Individual vehicles – individual installation options.

Europe-wide exchange service - If you have problems with your washing machine or integrated dryer while traveling that our telephone service cannot solve together with you, we will provide you with a free rental device during the warranty period (including warranty extension), including transport costs within the EU, until the repair of your device is completed.

## GUARANTEE SERVICE

*Uncomplicated*

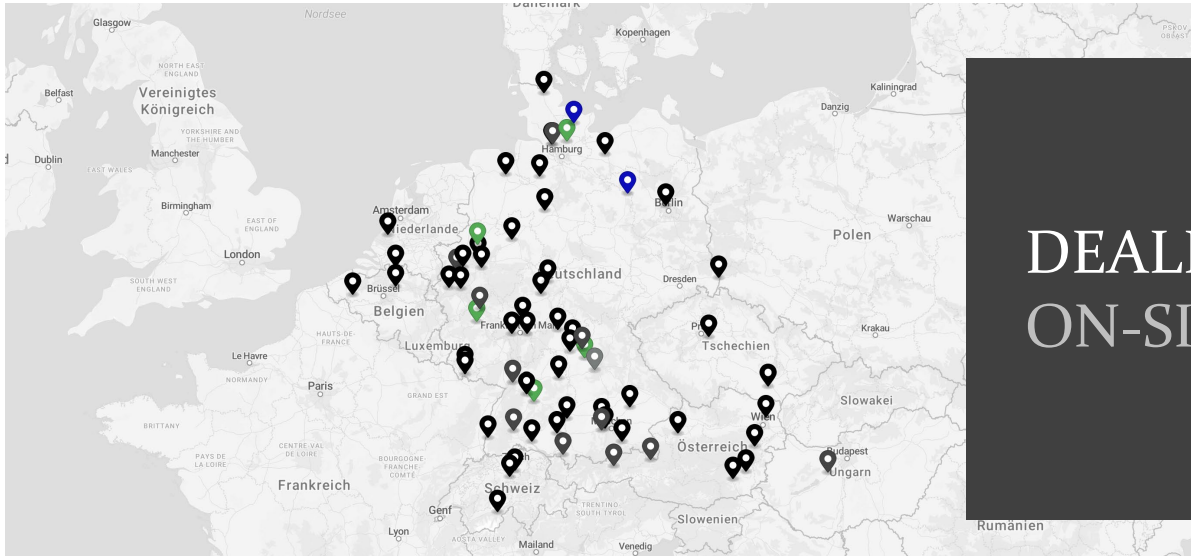

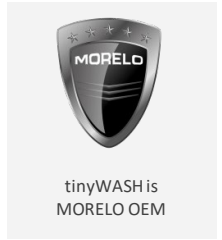

### MOBILITY GUARANTEE

Europe-wide replacement in case of defect within 7 working days (depending on DHL transport times).

### WARRANTY EXTENSION

Optionally, we offer a warranty extension for our devices for 12, 24 and 36 months. The warranty period can thus be extended to a total of 60 months.

tinyWASH is available in 7 countries throughout Europe from more than 70 specialist dealers, specialist workshops and body manufacturers. Our partners will be happy to help you.

DEALER  
ON-SITE SERVICE

*Regional*

On request, tinyWASH can supply the accessories.  
Installation kit for easy and flexible installation without many holes and screws,  
suitable sewage lifting pump for optional connection to the grey water tank, pressurised water  
pump for installation in mobile homes with submersible pump.

## ACCESSORIES

*Complete  
Tailor-Made*

CO2 neutral from production to use.

All unavoidable CO2 emissions are fully compliant with the Gold Standard, including our customers' first 500 washes.

The graphic features a central green globe with 'CO2' written on it, surrounded by icons for wind turbines, recycling, a car, a factory, and a leaf. The text 'Gold Standard' and 'Climate Security & Sustainable Development' is in the top left, and 'CO2 NEUTRAL ACCORDING TO GOLD STANDARD' is in a dark grey box on the right.

# SPECIFICATIONS

## Technical data

Weight	17kg
Width	58.2cm
Height	62.1cm
depth	14"
Power connection	220 - 240V 50/60Hz
Maximum power consumption	1500W
Sound dB(A)	Washing < 45 dB Spin < 71 dB
Water pressure	0.3 to 4 bar
Water temperature inlet	10°C to 60°C (supply water temperatures above 30°C significantly reduce the electrical energy requirement per wash cycle)

## Washing performance

Nominal washing capacity	2.50kg * *Nominal capacity 2.50 kg, maximum capacity up to 3.3 kg
Nominal drying capacity	1.5kg
Sling	max. 850 rpm
Washing programs	Smart (automatic), Hot (hot laundry), Quick (quick washing program), Kids (intensive laundry), Small (for small laundry items), eco 40-60 (energy saving), R+Spin (rinse and spin), Drum Clean (self-cleaning of the laundry drum)
Washing program running times	Smart 49 minutes (running time changes automatically depending on load and temperature), Hot 95 minutes, Quick 15 minutes, Kids 70 minutes, Small 70 minutes, R+Spin 27 minutes, Drum Clean 66 minutes, Dry 30 - 180 minutes, eco 40-60 2:42 hr
Additional program option	W-Level (set water quantity), Temp (set temperature), Rinse + (set spin time), Dry + (set drying time), D-Gent (set detergent dosage), Delay (delayed program start)
Detergent dosage	Detergent storage container with automatic dosing. If automatic dosing is not desired, the function can be deactivated and the detergent (liquid, powder, tab) can be added directly to the washing drum.
Water consumption	12 liters per quick wash cycle, drying process approx. 10 to 15 liters per 30 minutes depending on the load
Power consumption	0,33 kWh in wash cycle eco 40-60, 0.37 kWh in the Quickwash washing cycle

## Other features

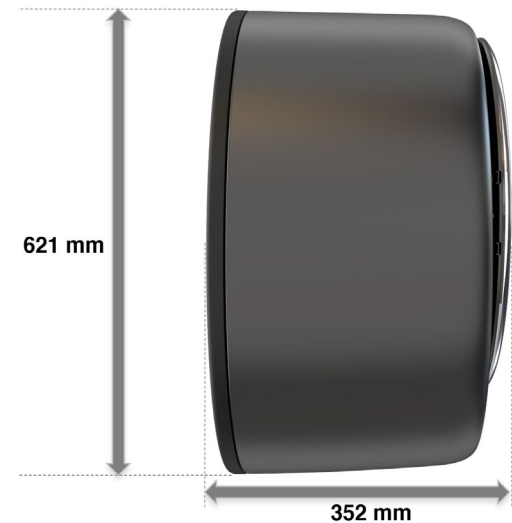

drive	Speed-controlled motor direct drive
washing drum	stainless steel
service	Touch display
lighting	Illuminated washing drum
door	Emergency release mechanism
Water	Emergency drain mechanism

## Assembly/Installation

Installation location/use	The tinyWASH Series WT-1-EU-x is intended for use in motorhomes, caravans, campers, vans, etc. and can also be installed in households.
Mounting type	Wall mounting, vertical. Horizontal operation when the machine is lying down is not possible. Attach to the wall/wall paneling with 4 screws or with the tiny WASH installation kit (not included). In the case of motorhome or caravan assembly, we recommend not screwing the machine directly onto the wooden paneling but using our assembly kit or a support plate, minimum size 50 x 50 cm (MDF, multiplex or comparable, at least 20 mm thick) with a sufficient number of screws and if necessary glue, and screw the washing machine into this plate. When installing directly, there is a risk that the machine will come loose due to the centrifugal force during the spinning process or that the wood in the wall paneling will tear out.
Electrics	220-240 V connection cable (1.5 m) with Schuko plug
fresh water	Fresh water from the motorhome supply, alternatively direct water connection if externally available. The fresh water pipe of the tiny WASH has a hose connector (identical to the Garden coupling).
sewage	Wastewater hose for connection to a canister (attention! Take into account 24 liter volume!) Alternatively, direct connection to the gray water tank of the motorhome (set can be ordered as an option). Please note that the machine does not have a wastewater pump. When laying the cables, care must be taken to ensure an appropriate gradient. Alternatively, it is possible to install an external lifting pump.

## Scope of delivery

Device	1 washer dryer tiny WASH
Water sewage	Fresh water hose (2 m), hose coupling, locking ring for machine connection. Waste water hose (2m) with locking ring for machine connection.
Fastening	4 screws with nuts M10. Installation material for installation at concrete walls in normal households not included.
documentation	Operating instructions including assembly instructions (German, English)
